EDUCATION

DAV International School

10th: 92%, 12th (PCM): 80%

Ahmedabad, Gujarat

Completed: May 2024

LJIET

Bachelor of Engineering (AI & ML)

Ahmedabad, Gujarat

Sep 2024 – Sep 2028

EXPERIENCE

AI and ML Intern

Moon Finance

May 2025 – Present

Bangalore, Karnataka

- Developed a FastAPI application to fetch financial reports from stock screener websites, utilizing BeautifulSoup and BytesIO for web scraping and PDF parsing.
- Fine-tuned open-source LLMs for sentiment analysis and fundamental analysis of financial data, leveraging LLaMA Parse, NumPy, Pandas, and scikit-learn for data processing.
- Utilized Git and GitHub for version control to manage and organize code for individual financial data scraping and model training projects.

PROJECTS

Test AI | Python, Flask, HTML, CSS, JavaScript, PyPDF, BytesIO, Gemini API

July 2025

- Developed a full-stack web application using Flask and frontend technologies to generate test cases from SRS documents.
- Integrated Google Authentication and Gemini API with prompt engineering to process SRS documents and generate test cases.
- Converted test cases into downloadable CSV files for quality assurance teams.
- Maintained solo project using Git and GitHub for version control.

Insurance-Premium-Predictor | Python, Scikit-Learn, Jupyter Notebook, Pandas, Matplotlib, Seaborn

July 2025

- Built a machine learning model to predict insurance premiums using the Medical Cost Personal Dataset.
- Performed preprocessing including missing value handling, encoding, and feature scaling.
- Conducted EDA and visualized correlations between features like BMI, age, and smoking status.
- Handled outliers to improve prediction stability.
- Trained and evaluated a Linear Regression model with strong R^2 scores.

Job Scraper - TimesJobs | Python, BeautifulSoup, Requests, File I/O

June 2025

- Developed a Python-based web scraper to extract job listings filtered by keywords and experience from TimesJobs
- Parsed job title, company name, location, experience, and skills using BeautifulSoup.
- Applied logic to ensure only complete listings are stored and formatted output to a structured text file.
- Optimized scraper for flexibility and resiliency against HTML layout changes.

CERTIFICATES

Supervised Machine Learning: Regression and Classification: Coursera (Andrew Ng)

May 2025

Git and GitHub Bootcamp: Let'sUpgrade

April 2025

TECHNICAL SKILLS

Languages: Java, Python, SQL (Postgres), HTML/CSS

Libraries & Frameworks: Scikit-learn, Pandas, NumPy, FastAPI, Matplotlib, BeautifulSoup

Developer Tools: Git, VS Code, PyCharm, IntelliJ, Jupyter Notebook
